About Cork

Sustainable, comfortable,
resistant & healthy.

It has **unique** and **incomparable qualities** which no ingenious human has yet copied or improved.

The ultimate ecological product meets the most comfortable & luxurious interior decorating design.

The harvesting of the bark of the cork oak offers one of the finest examples of traditional, sustainable land use.

LIGHT MATERIAL

NATURAL
ELASTICITY

DURABILITY

THERMAL & ACOUSTIC
ISOLATOR

Why Cork?

Its extreme resilience, impermeability, lightness and insulating efficiency... makes cork an unique material.

A Sustainable Alternative

Cork renews itself naturally. The stripping doesn't harm the tree, so no trees are cut. Cork oak forests also support great natural biodiversity, including wildlife, pastures and aromatic shrubs.

Comfortable Ambience

Cork floors create a warm, comfortable, resilient surface. With its amazing composition of 40 million cells per cubic centimeter, each one filled with air, cork inhibits the conduction of temperature and sound. As a result we have an excellent thermal and acoustic insulator.

Resistant

Cork is remarkably resistant to wear, as it is less affected by impact and friction than other hard surfaces, due to its cellular composition.

Healthy Atmosphere

Suberin, an inherent substance of cork, is a natural insect repellent. Even termites are kept away. Cork is antimicrobial, does not pose risk to asthma sufferers and is resistant to mold and mildew. If allergies are a problem, yet you enjoy the comfort and warmth of a carpet, cork is the ideal alternative.

Cork, the perfect eco material.

Cork is a natural product and an excellent thermal and acoustic insulator. Create a warm, comfortable and resilient surfaces with cork floors.

Floating

Floating floor with superior comfort & quick installation.

Ok Radiant Heating
